1.5 Do you automatically enroll households without a direct annual application? Yes No

If Yes, explain:

1.6 How do you ensure there is no difference in the treatment of categorically eligible households from those not receiving other public assistance when determining eligibility and benefit amounts?

The Grand Ronde Tribes will use their existing payment matrix which takes into consideration household income, household size, and energy cost. They also need to be within the service area. Highest benefits will go to the households with the lowest income and the largest family size. Households may also be made eligible where one or more individuals receive TANF, Food Stamps / SNAP, SSI, or certain means tested veterans program payments. Their benefit level will be as shown on the income by household size matrix but if their household is over income (and yet they are still categorically eligible) they would still receive the minimum payment shown for that household size. Our existing LIHEAP service area includes Polk, Yamhill, Marion, Clackamas, Multnomah, Washington and Tillamook counties of Oregon.

Section 4: CRISIS ASSISTANCE

Eligibility - 2604(c), 2605(c)(1)(A)

4.1 Designate the income eligibility threshold used for the crisis component

Add	Household size	Eligibility Guideline	Eligibility Threshold
1	All Household Sizes	State Median Income	60.00%

4.2 Provide your LIHEAP program's definition for determining a crisis.

An energy crisis exists when a household faces an energy burden which depletes or threatens to deplete financial resources. This would be a sudden/unexpected event beyond their control resulting in an inability to pay heating or cooling costs such as a sudden loss of a job or benefits or domestic violence. An energy crisis also exists which poses a potential health threat and/or safety threat to the well-being of the household including weather-related causing interruption of service and supply shortage emergencies and extreme heat or cold. Benefit levels for households in crisis are based on the need to reduce or eliminate the crisis. A crisis exists if they are out of fuel/energy or at imminent risk of being so. Imminent is within 48 hours.

4.3 What constitutes a life-threatening crisis?

A life-threatening crisis exists when a household members health and/or well-being would likely be endangered if assistance is not provided to continue heating/cooling energy services. Generally, this would require an active medical certificate but may be deemed a life-threatening crisis if LIHEAP program staff determine extreme circumstances are present (e.g. extreme cold or heat, fuel supply shortage).

In addition, the household must either be disconnected or at imminent risk of disconnection (within 5 days of application) to be considered as having a life-threatening crisis situation. Households with deliverable fuels must either be out of fuel or at imminent risk of being out of fuel. Imminent is within 48 hours.

Life-threatening crisis situations must be addressed within either 18 hours (if already disconnected) or 48 hours (if at risk of disconnection) of application. These timeframes must be documented to ensure compliance with the federal requirement and must include comments outlining how the situation was addressed.

Crisis Requirement, 2604(c)

4.4 Within how many hours do you provide an intervention that will resolve the energy crisis for eligible households? 48Hours

4.5 Within how many hours do you provide an intervention that will resolve the energy crisis for eligible households in life-threatening situations? 18Hours

Section 13: Reduction of home energy needs, 2605(b)(16) - Assurance 16

13.1 Describe how you use LIHEAP funds to provide services that encourage and enable households to reduce their home energy needs and thereby the need for energy assistance?

At intake a brochure will be provided and explained to eligible households describing basic conservation techniques and information. Brochures will give phone numbers, web site addresses, and will indicate that power companies can be contacted to trouble shoot a basic energy problem if a household has a sudden rise in energy bills.

As part of the weatherization program a needs assessment is performed. If weatherization is needed then substantial improvements can be made (weatherization is capped at 15% of our allocation).

13.2 How do you ensure that you don't use more than 5% of your LIHEAP funds for these activities?

No funds are allocated/budgeted for reduction of energy needs.

13.3 Describe the impact of such activities on the number of households served in the previous Federal fiscal year.

This past year five (5) households received needs assessments but all of them were part of the weatherization projects which then improved energy use conservation and energy savings. During the provision of these services the Tribe also advises the recipient of the comparative benefit of the weatherization measures and the energy savings they provide.

13.4 Describe the level of direct benefits provided to those households in the previous Federal fiscal year.

The direct benefits from the needs assessment is part of qualifying the residence for the planned weatherization. That benefit level (as a step) is basically the same for all five (5) households served. The benefits from each measure varied per household served depending on the condition of the residence prior to this service but those benefits are part of the weatherization funding not the reduction of energy needs funding category/assurance.

13.5 How many households applied for these services? 5

13.6 How many households received these services? 5
